1. Results Summary

1.1 England

An interactive map showing the results of the 2019 local elections in England is published on the [Commons Library website](#).

Local elections in England 2019: results

The **Conservatives** won the highest number of seats up for election (3,559). They won or retained 93 of the councils which had elections on 2 May 2019, and now control a total of 143 councils overall in England – a decrease of 55 compared to 2018.

The **Conservatives** gained six councils, two from Labour (North East Derbyshire and Redditch) and four that were previously without overall control. They lost control of 51 councils: four to Labour, nine to the Liberal Democrats, one to the Residents of Uttlesford, and 37 to no overall control.

The **Labour** Party won 2,020 of the seats up for election. They won or retained control of 60 councils at this year's elections, taking their total council control to 91 (seven fewer than last year).

Labour gained eight councils, four from the Conservatives and four that were previously without overall control. They lost 18 councils: two to the Conservatives, 15 to no overall control, and one to the Ashfield Independents. Labour candidates won in two out of the five local council mayoral elections, as well as the North of Tyne metro-mayor election.

The **Liberal Democrats** won 1,351 of the seats up for election and won or retained 18 councils, taking their overall council control to 23. This is the highest it has been since 2010.

The **Liberal Democrats** gained 13 councils, nine from the Conservatives and four where there was no overall control. The Liberal Democrats did not lose control of any council. The Liberal Democrat candidate won in the Bedford council mayoral election.

The **Green Party** won 263 seats at the local elections, around 3% of all seats up for election. This is the highest number of seats the party has won in more than 20 years. The Green Party does not currently control any council in Great Britain.

UKIP won 34 seats at this year's local elections, 31 more than in 2018 but substantially fewer than the 201 seats won in 2015. The highest percentage of seats up for election won by UKIP was in 2013 (6%). UKIP does not have control of any council.

Voter ID pilot scheme

There were pilots for voter ID schemes in 10 local authorities. The [Local Government Chronicle](#) reported that in the voter ID pilot areas, more than 800 people were turned away from polling stations for not having the required proof of ID and did not return to vote. Subsequent data released by the [Cabinet Office](#) showed this number was 702.

The Cabinet Office and the [Electoral Commission](#) both evaluated the pilots and found that perceptions of the security of the electoral process improved (notwithstanding local variations).

1.2 Northern Ireland

The **Democratic Unionist Party** remained the largest party in Northern Ireland, winning 122 seats (26% of all seats up for election). This was 8 fewer than in the previous elections, held in 2014.

Sinn Féin was the second largest party, winning 105 seats (23%), the same as in 2014. The **Ulster Unionist Party** came third with 75 seats (16%), 13 fewer than in 2014.

2. Elections in England

England is divided into administrative areas governed by local authorities, which are either:

- Single tier authorities (unitary councils, metropolitan borough councils, and London borough councils); or
- Two-tier authorities, with county councils covering multiple lower-tier district councils.

On 2 May 2019, 248 councils in England held elections: 168 shire districts, 33 metropolitan boroughs, and 47 unitary authorities.

2.1 Electoral cycles

Local council members are elected for 4-year terms using the first past the post system. There are a variety of electoral cycles, so not all councillors are elected at the same time: some authorities elect their entire council at once, while others elect a proportion of members each year.

There are three methods of holding elections to local councils:

- **Whole:** All councillors are elected once every four years, in whole council elections.
- **Thirds:** Councillors are elected for four-year terms by thirds; that is, at each election, a third of the councillors are elected. Elections are held every year except in years when there are county council elections in the rest of England.
- **Halves:** Councillors are elected for four-year terms by halves; that is, at each election, half the councillors are elected. Elections are held every two years.

Local election cycles in England: a rough guide

	2016	2017	2018	2019	2020	2021	2022
Unitary Councils							
Metropolitan							
London Boroughs							
District Councils							
County Councils							

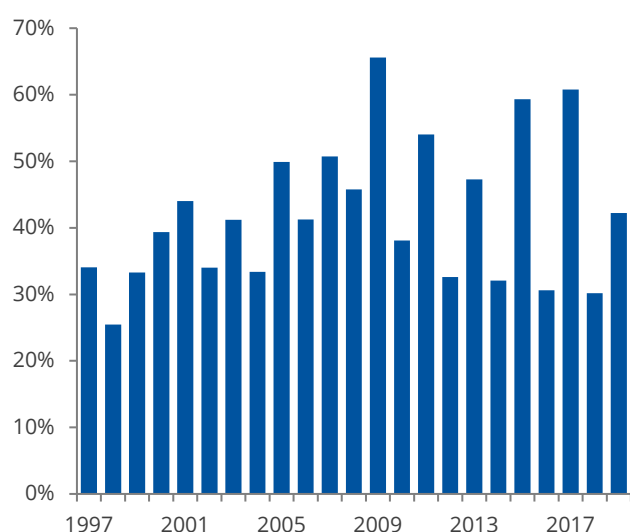

Shaded areas indicate when elections are scheduled.

In principle, the set of seats up for election this year was last up for election in 2015. However, in practice, the sets are not identical, because there have been boundary reviews in several local authorities. These have led to changes in the number of seats on some councils, and all councils (even those normally using a different method for holding elections) must hold elections for the entire council following boundary reviews. Local council by-elections may also take place at the same time as scheduled local elections should a council seat become vacant during a councillor's term.

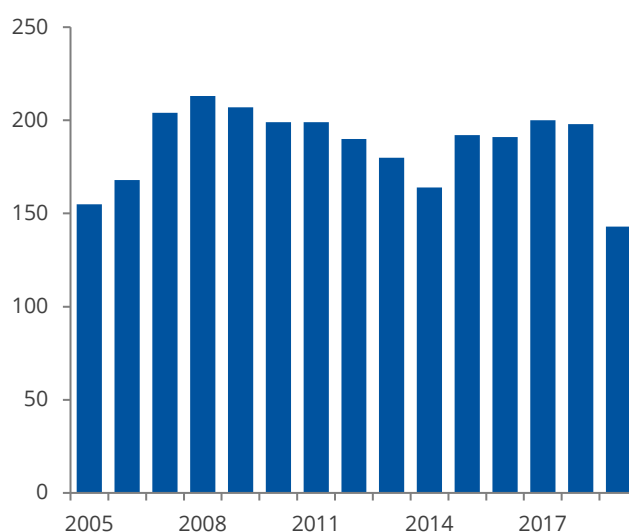

Conservative

The Conservatives won 42% of the seats up for election on 2 May 2019, up from 30% in 2018, but down from 59% in the last set of comparable elections in 2015. The overall number of councils controlled by the Conservatives decreased by 49 compared to immediately before the election. At 143, it is the lowest in more than 15 years.

Labour

Labour won 24% of the seats up for election on 2 May 2019, less than half the proportion won in 2018. Compared to 2015, the proportion of seats Labour won decreased by one percentage point. The overall number of councils controlled by Labour decreased by six compared to 2018; it is the lowest number since 2012.

Liberal Democrat

The Liberal Democrats won 16% of all seats up for election, four percentage points higher than the proportion won last year, and more than double the proportion they won in 2015. For the fourth year in a row, the Liberal Democrats saw an increase in the overall number of councils they control, rising to 23, the highest since 2010 (but not as high as in 2006, when they controlled 32 councils).

Green

The Green Party won 263 seats at the local elections on 2 May 2019, around 3% of all seats up for election. This is the highest number of seats the Green Party has won in more than twenty years. The Green Party does not currently control any councils in Great Britain.

Source: Rallings and Thrasher, "Voters turned their backs on the main two parties", Local Government Chronicle, 7 May 2019

The **Conservatives** hold the greatest share of seats and councils in England (41% and 42% respectively). **Labour** are second with 33% of councillors and 27% of councils controlled. The **Liberal Democrats** control 7% of councils, while 23% of councils have no overall control, and five councils are controlled by an 'other' party.

The following table looks at council composition and control for all local authorities in England immediately following elections by year (generally held on the first Thursday of May). As above, this includes those where elections were not held.

English council control immediately after local elections

	Number					Percent

2019	143	91	23	5	79	42%	27%	7%	1%	23%

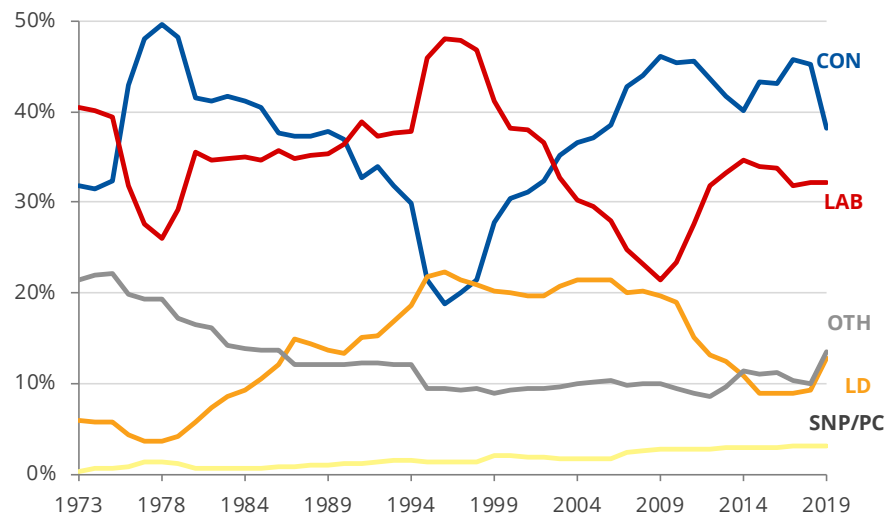

Sources: Rallings and Thrasher, "Voters turned their backs on the main two parties", Local Government Chronicle, 9 May 2019; House of Commons Library

The **Conservatives** control 55 fewer councils compared with 2018 and **Labour** control seven fewer than last year. The **Liberal Democrats** control 23 councils, more than double the number they controlled in 2018, and this is the fourth year in a row they increased the number of councils they control. However, this is still lower than any time in the decade before 2010. Their highest return in this period came in 2006, when they controlled 32 councils, only 22 fewer than Labour at the time. The proportion of councils that have no overall control has almost doubled, from 12% in 2018 to 23%.

In the recent past, the **Conservatives** typically controlled approximately twice as many councils as **Labour** (for example, 56% vs. 28% in 2018). This was no longer the case in 2019 (42% vs. 27%). Their best result in the past decade was in 2009 when they controlled 59% of councils, compared with **Labour's** 9%.

The chart below shows the number of councillors by party in Great Britain from 1973 to 2019. Following the elections in May 2019, the **Conservatives** have 7,507 (38% of all) councillors in Great Britain, **Labour** have 6,332 (32%), the **Liberal Democrats** 2,531 (13%), and **Plaid Cymru** and the **Scottish National Party** combined have 622 (3%). There are a further 2,655 (14%) councillors in Great Britain who are either independents or affiliated with other parties. This is up from 2,019 (10%) in 2018.

Party affiliation of councillors in Great Britain

Sources: Rallings and Thrasher, "Voters turned their backs on the main two parties", Local Government Chronicle, 9 May 2019; House of Commons Library

3.1 Population based comparison

There is substantial variation in the size of local council areas, both in terms of geography and population. The table below shows the number and proportion of people living in councils controlled by different parties, immediately after the 2019 local elections.

Population in councils controlled by parties after 2019 elections

	No elections	LAB	CON	NOC	LD	OTH
Number of councils	69	60	93	74	18	3
% of English councils	22%	19%	29%	23%	6%	1%
Population of councils	16,592,504	13,404,529	12,236,161	11,290,204	2,157,522	296,258
% of English population	30%	24%	22%	20%	4%	1%

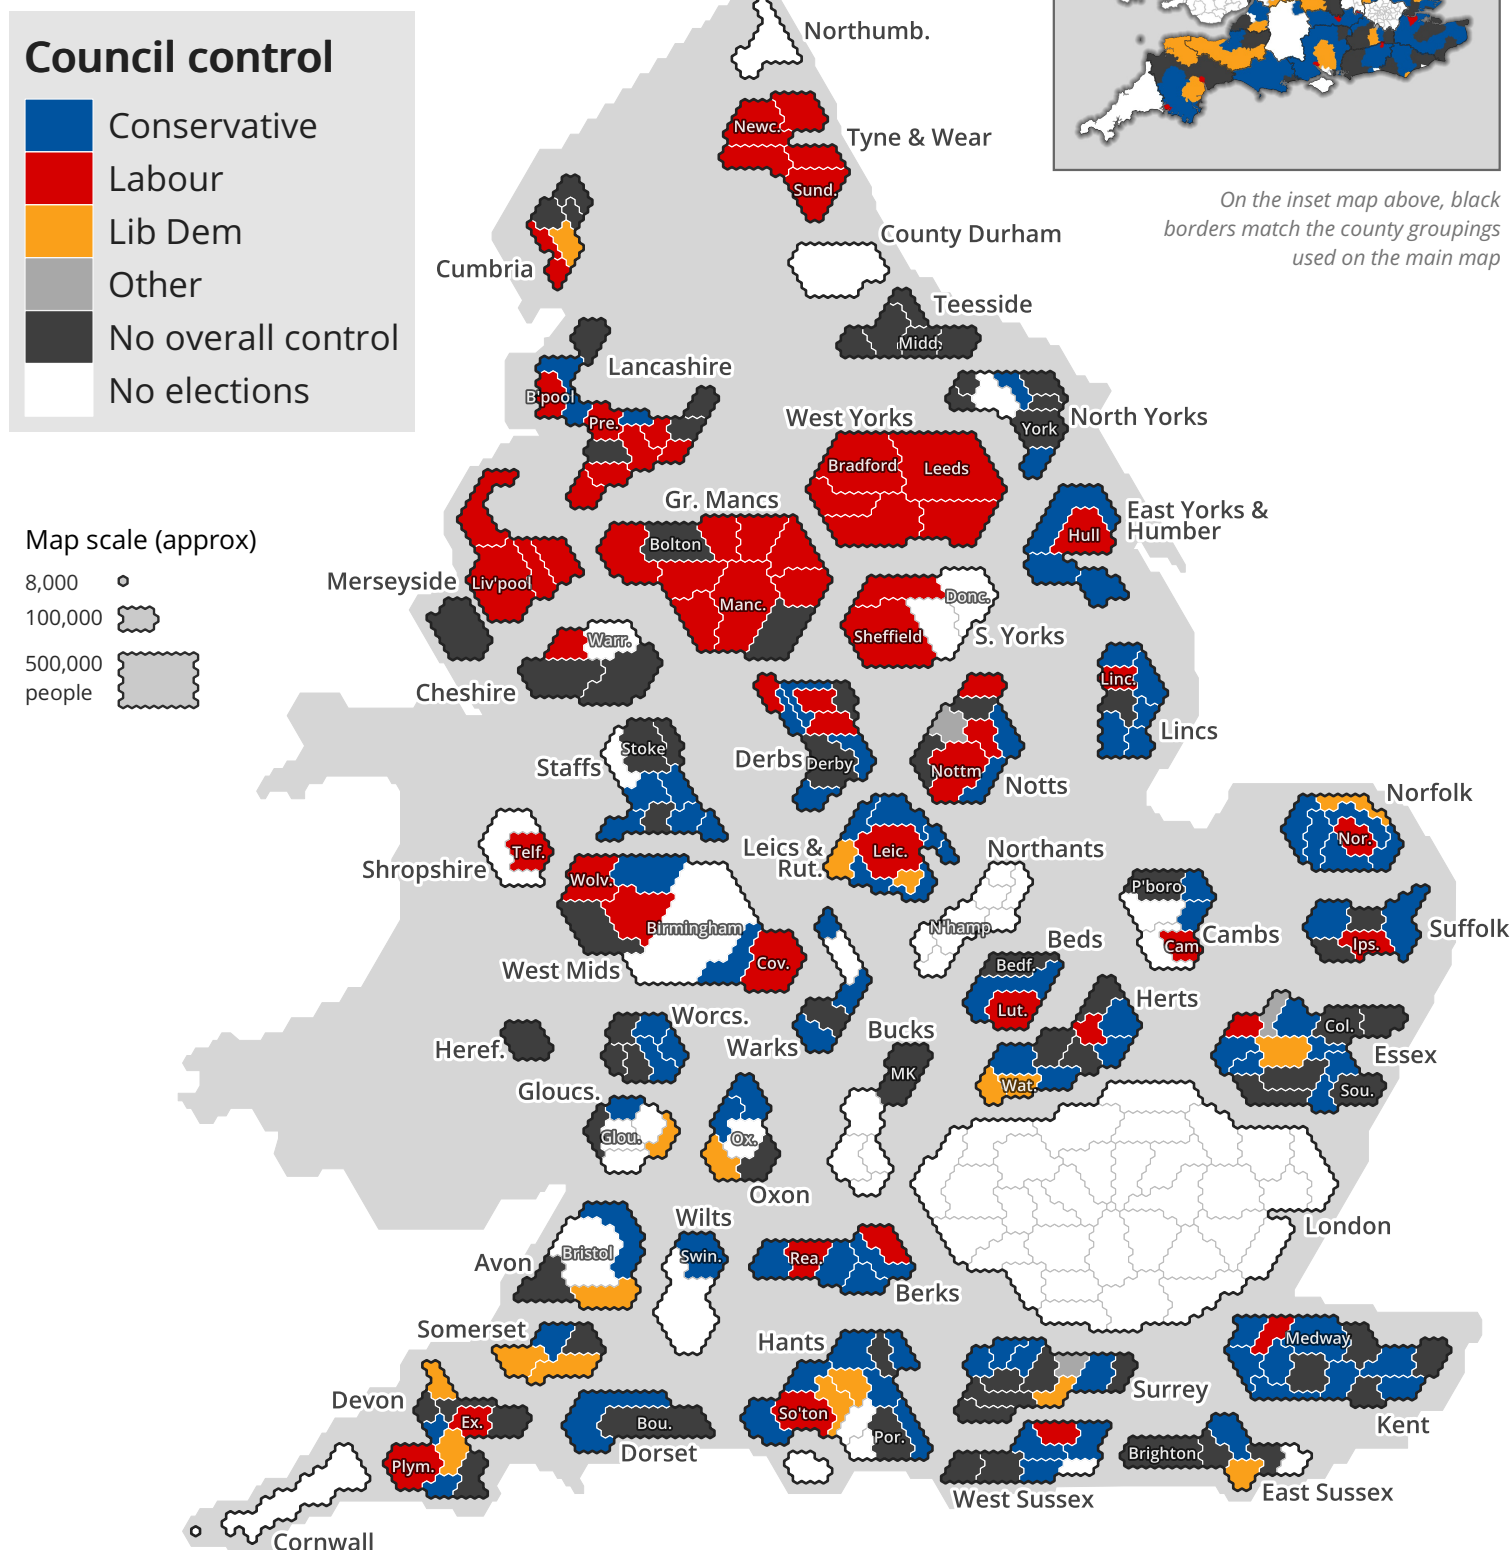

Source: ONS Annual Population Estimates, Mid-2018

The map below shows which parties controlled councils that held elections in 2019, immediately after the elections. Each local authority is scaled in size according to their population. The map shows district, metropolitan borough and unitary authority councils. There were no elections in county councils and London boroughs.

Local election results 2019: population-based map

On this **population-based map**, local authorities are **scaled in size according to their populations**: each small hexagon represents a population of around 8,000 people. Areas are grouped by traditional counties and other recognisable areas - these groups include unitary authorities and **don't all reflect current local government structures**. Lines between hexagons show authority boundaries. Extra labels are provided for large towns & cities to help you locate particular places (e.g. 'Sou.' = Southend).

On traditional maps (such as the inset, right), sparsely-populated rural areas are visually over-represented since they appear much larger than densely-populated urban areas. Since rural and urban areas can be very different to one another, this means that traditional maps don't always give a full picture of the data when viewed on their own.

4. England: mayoral elections

There were mayoral elections in six areas of England on 2 May 2019. The North of Tyne region held its first election for the mayor of the combined authority (known as a 'metro-mayor'). Five local authorities held mayoral elections for their respective councils.

Mayoral elections are held using the Supplementary Vote system, where voters indicate their first and second preference. If no candidate achieves 50% of first preference votes, only the two candidates with the highest numbers of votes are retained. The second preference votes for these candidates recorded on the ballot papers of the eliminated candidates are counted and the candidate with the highest number of total votes is elected.

Metro-mayor election result

		First preference		Second preference		Total vote	
		Number	%	Number	%	Number	%
North of Tyne Combined Authority							
Charlie Hoult	CON	45,494	24.9%	14,595	49.6%	60,089	43.9%
Jamie Driscoll	LAB	62,034	33.9%	14,828	50.4%	76,862	56.1%
John Appleby	LD	23,768	13.0%				
William Jackson	UKIP	20,131	11.0%				
John McCabe	IND	31,507	17.2%				
Electorate		572,229					
Turnout		32.0%					

Source: Results published online or provided by local authorities; BBC

The **Labour** candidate for the North of Tyne Combined Authority (Jamie Driscoll) won after the election went to the second preference votes round, against the **Conservative** candidate Charlie Hoult. Turnout for the election was 32.0%, higher than the 25.4% recorded in the metro-mayor election held in 2018.

The **Labour** candidate won in two out of the five local council mayor elections (Leicester and Mansfield). Independent candidates won in Middlesbrough and Copeland, while in Bedford, the **Liberal Democrat** candidate was elected mayor. In three out of the five elections, a mayor was elected based on first preference ballots. The average turnout for the five mayoral elections was 33.0%.

No women or people from a BAME background were elected mayor in this year's elections; last year, one woman was elected mayor.

Council mayoral election results

		First preference		Second preference		Total vote	
		Number	%	Number	%	Number	%

5. England: voter ID pilot schemes

In the May 2019 local elections, ten local authorities across England took part in [voter ID pilots](#):

- Voters in [Pendle](#) and [Woking](#) were asked to show photo ID before they were given their ballot papers;
- [Broxtowe](#), [Craven](#), [Derby](#), [North Kesteven](#) and [Braintree](#) required voters to present either one form of photo ID or up to two forms of non-photo ID;
- [Mid Sussex](#), [Watford](#) and [North West Leicestershire](#) tested using poll cards as a means of identification;
- Pendle ran a separate postal vote pilot, looking at the security of postal votes and providing additional guidance in postal vote packs.

5.1 Background

The [Electoral Commission](#) recommended in 2014 that voters in Great Britain should be required to show photo ID before casting a vote at a polling station, as is already the case in Northern Ireland. In 2015, the Commission published [a report](#) setting out how a 'voter ID' scheme could be implemented across Great Britain. The voter ID models trialled in 2018 and 2019 were based on recommendations made by Sir Eric Pickles in his independent [review of electoral fraud](#).

The [Government has described the voter ID pilots](#) as providing "further insight into how best to ensure the security of the voting process and reduce the risk of voter fraud." [Critics have argued](#) that particular groups of people are less likely to have the types of ID necessary to vote and risk being effectively disenfranchised.

The [Electoral Commission](#) reported that following the 2018 local elections, the police investigated 266 allegations of electoral fraud resulting in one conviction and two police cautions.

As part of its 'voter ID scheme', the [Electoral Commission](#) recommended that photographic driving licences, passports, Proof of Age Standards Scheme (PASS) cards, military identification cards, police identification cards and firearms licences were acceptable forms of ID for electors. The Electoral Commission estimated how many electors across Great Britain may have access to one of the IDs deemed to be acceptable:

- Approximately 3.5m electors (7.5% of the electorate) would have none of the forms of photo ID highlighted, i.e. 92.5% of electors would already have at least one form of acceptable photo ID;
- Limiting acceptable ID to passports and photographic driving licences would see potentially 11m electors, or 24% of the electorate, without acceptable ID;
- Allowing only passports, photographic driving licences and Oyster Photocards to be used reduce the number of electors without ID to 6m, or 13% of the electorate.

In the pilots, local authorities issued free photographic IDs to those who did not have suitable forms of identification.

Following the 2018 local elections, the [Electoral Commission](#) found that “overall, the voter identification requirements trialled in May 2018 worked well.” Voter ID pilots and their evaluation by the Electoral Commission and the Cabinet Office will be discussed in more detail in a forthcoming briefing paper.

5.2 How many people were prevented from voting?

The [Local Government Chronicle](#) (LGC) reported that in the voter ID pilot areas, more than 800 people were turned away from polling stations for not having the required proof of ID and did not return to vote. This meant that on average, 102 voters in each pilot area failed to vote, compared with 70 per pilot area in 2018. The highest number of people turned away and not coming back to vote was in Derby (256) while the highest proportion was in Craven (0.7%), although data was not yet available for all councils.

The LGC further reported that returning officers from pilot areas said most voters had brought ID with them and that turnout was similar to previous local elections. However, they also noted that:

While the numbers who did not vote are small, they were potentially significant in cases where the election results came down to a handful of votes. In Mid Sussex, where 78 people didn't vote after being turned away for not having a poll card or photo ID with them, there were three instances in which a candidate won by less than 25 votes.

Subsequent analysis of the pilots by the [Cabinet Office](#) shows that the number of people who did not return to vote after being turned away for not having suitable ID varied between 0.03% (Mid Sussex) and 0.7% (Pendle) of voters. The number for each local area is included in the table below.

People not returning to vote

Having been turned away for not having right ID

ID type	Number	% of people turning up at polling station
Poll card	102	0.21%
Watford	33	0.20%
Mid Sussex	8	0.03%
North West Leicestershire	61	0.40%
Mixed ID	515	0.46%
Braintree	73	0.30%
Craven	49	0.70%
North Kesteven	68	0.40%
Broxtowe	69	0.30%
Derby	256	0.60%
Photo ID	123	0.40%
Woking	22	0.10%
Pendle	101	0.70%
Total	740	

The Cabinet Office analysis also found increases in voters' confidence in the electoral process, particularly in areas where photo identification had been trialed (although there was variation between areas). Likewise, the [Electoral Commission](#) found that overall, taking part in the pilots had a positive impact on people's perception of the security of the vote.

5.3 Was turnout affected by the ID requirements?

Turnout in the ten local authorities with voter ID pilots was lower than it was at the last comparable local elections in 2015. However, there was a general election that day, which affects turnout. Similarly, in 2011, the [AV referendum](#) took place on the same day as the local elections. The table below shows that in most places turnout was also lower than it had been in 2007, when the same seats were up for election and no other elections took place. There was considerable variation between local authorities.

Turnout in the voter ID pilot councils

		Turnout				% pt change vs. 2007
ID requirement		2007	2011	2015	2019	
Derby	Piece(s) of ID	35.1%	39.2%	61.1%	35.9%	0.8%
Braintree	Piece(s) of ID	36.9%	42.8%	62.9%	31.0%	-5.9%
Broxtowe	Piece(s) of ID	44.6%	49.0%	70.9%	40.0%	-4.6%
Craven	Piece(s) of ID	42.8%	45.6%	69.3%	37.0%	-5.8%
Mid Sussex	Polling card	41.5%	48.0%	67.8%	38.5%	-3.0%
North Kesteven	Piece(s) of ID	35.7%	46.8%	60.4%	31.0%	-4.7%
North West Leicestershire	Polling card	41.4%	45.1%	69.4%	n/a	
Pendle	Piece(s) of ID	43.0%	43.8%	66.9%	38.0%	-5.0%
Watford	Polling card	34.4%	40.5%	62.7%	n/a	
Woking	Piece(s) of ID	43.6%	49.1%	68.2%	36.5%	-7.1%

6. GB: national share of the vote

Opinion polling aside, it is difficult to get an overview of how much support political parties attract across Great Britain in the years between general elections, because local elections are not held in all local authorities at the same time. Academics Colin Rallings and Michael Thrasher overcome this problem by using the results of local elections to estimate how the major parties would have fared had these elections taken place throughout Great Britain. Rallings and Thrasher's National Equivalent share of the vote (NEV) is a widely used estimate of where the parties stand in the years between general elections.

Estimated NEV at local elections: Great Britain

The table below shows that **Labour** and the **Conservatives** both had an estimated vote share of 31%, down five and six percentage points respectively compared with 2018. The **Liberal Democrats'** NEV increased from 14% in 2018 to 17%.

The 'others' category's NEV increased from 13% to 21%, the first increase since 2013. 'Others' achieved a similar proportion of the NEV in 2015 (22%) and 2016 (21%), and their NEV had been higher before then, peaking at 32% in 2013. This is because the 'others' category includes UKIP; in 2013, UKIP attracted 22% of the NEV, with the remaining 10% shared by independents and other parties. By contrast, in 2019 it was the independents and other parties who achieved the larger part of the 'other' NEV (17%): UKIP attracted 4%.

Estimated NEV at local elections: Great Britain

	CON	LAB	LD	OTHERS	of which UKIP

2013	26%	29%	13%	32%	22%
2014	30%	31%	11%	28%	18%
2015	36%	32%	10%	22%	12%
2016	32%	33%	14%	21%	12%
2017	39%	28%	18%	15%	4%
2018	37%	36%	14%	13%	
2019	31%	31%	17%	21%	4%

Notes: Years with grey shading indicate that a general election was held on the same day and in these years general election vote share is shown. UKIP vote share was calculated between 2013 and 2017 and again in 2019. At the 2017 General Election the GB vote share was 43.4% for the Conservatives, 41.0% Labour, 7.6% Liberal Democrats, and 8% for other parties/independents. Figures for 2015 have been updated following publication of the 2019 analysis.

Sources: Rallings and Thrasher, British Electoral Facts 1832-2012; Rallings and Thrasher, Local Elections Handbook, various years; Rallings and Thrasher, "Voters turned their backs on the main two parties", Local Government Chronicle, 9 May 2019

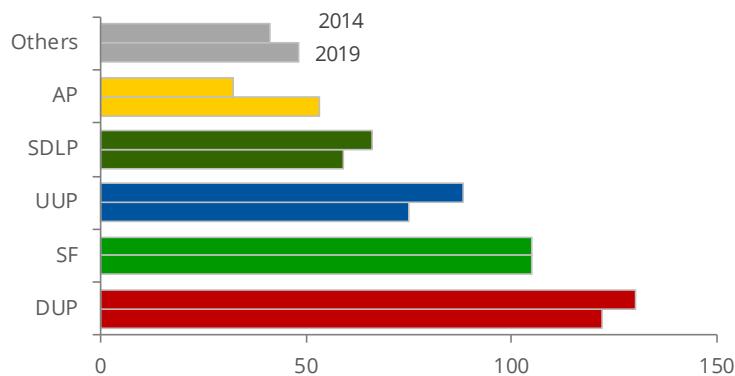

7. Northern Ireland: councillors

Local elections take place in all local authorities in Northern Ireland every four years. All councillors are elected at the same time, in contrast to England, where a selection of councillors is elected each year. Voters in Northern Ireland vote by ranking all candidates in their area in order of preference. More information about the voting process is available from [the BBC](#).

The chart below shows how many councillors each party had following these elections, compared to the 2014 elections. The **Democratic Unionist Party** remained the largest party in Northern Ireland, winning 122 seats (26% of all seats up for election). This was 8 fewer than in the previous elections. **Sinn Féin** remained the second largest party, winning 105 seats (23%), the same as in 2014. The **Ulster Unionist Party** came third with 75 seats (16%), 13 fewer than in 2014.

Northern Ireland local elections 2019

Number of councillors compared with 2014

Source: the [Electoral Office of Northern Ireland](#), BBC, [Northern Ireland local elections](#)

All councils in Northern Ireland are governed by coalitions of several political parties: none of the parties holds more than half of the seats on any council.

8. About the data

Local election results are not collated centrally by an official body. Academics Colin Rallings and Michael Thrasher have compiled [Local Elections Handbooks](#) for England each year since 1985. Historic data quoted in this briefing paper is derived, in most cases, from these handbooks; 2019 figures for net change in seats and councils controlled are derived from Rallings and Thrasher's May 2019 articles in [The Sunday Times](#) and [Local Government Chronicle](#).

The House of Commons Library has collected 2019 data on the number of seats won or retained by party and resultant council control for those councils in which elections occurred. These have been cross-checked with data collected by the BBC and Press Association.

Reported findings may in some cases differ from analysis available elsewhere, as a result of different definitions or reference points used. Local elections results can be analysed by looking at either:

- a. The total number of councils controlled and councillors a party has at a given time, usually immediately following elections. Chronological comparisons focus on the situation immediately after two or more elections (as in section 4 and the reference tables below); or
- b. The number of councils won/lost or seats won/lost at any given round of elections. This entails a comparison of the situation immediately before and immediately after these elections (as on the party pages).

It is not always possible to compare directly between data based on definitions 'A' and 'B' as they in effect monitor different things.

A party's number of councillors and number of councils controlled are subject to change between the yearly local elections (for example through defections and by-elections), meaning figures used to calculate net change at an election ('B') will not necessarily match with the totals monitored on an annual basis ('A').

Moreover, we record a party as in control of a council when they hold a majority of seats (i.e. more than 50%). Other organisations may report a party as in control of a council when they hold exactly 50% of seats, or when they hold fewer seats but have reached a governing agreement with another party.

About the Library

The House of Commons Library research service provides MPs and their staff with the impartial briefing and evidence base they need to do their work in scrutinising Government, proposing legislation, and supporting constituents.

As well as providing MPs with a confidential service we publish open briefing papers, which are available on the Parliament website.

Every effort is made to ensure that the information contained in these publicly available research briefings is correct at the time of publication. Readers should be aware however that briefings are not necessarily updated or otherwise amended to reflect subsequent changes.

If you have any comments on our briefings please email papers@parliament.uk. Authors are available to discuss the content of this briefing only with Members and their staff.

If you have any general questions about the work of the House of Commons you can email hcenquiries@parliament.uk.

Disclaimer

This information is provided to Members of Parliament in support of their parliamentary duties. It is a general briefing only and should not be relied on as a substitute for specific advice. The House of Commons or the author(s) shall not be liable for any errors or omissions, or for any loss or damage of any kind arising from its use, and may remove, vary or amend any information at any time without prior notice.

The House of Commons accepts no responsibility for any references or links to, or the content of, information maintained by third parties. This information is provided subject to the [conditions of the Open Parliament Licence](#).
