Summary

Elections were held in 200 councils across Great Britain on 5 May 2022. England held elections in 146 councils, while all 32 councils in Scotland and 22 Welsh councils were up for election.

Across England, Wales and Scotland, elections were held for 6,863 seats. After the elections there were 15 seats across Great Britain left vacant for various reasons. There were also elections for six mayors and the second election of a metro-mayor in South Yorkshire. Bristol held a referendum on whether to change the current system of a directly elected mayor to a committee system.

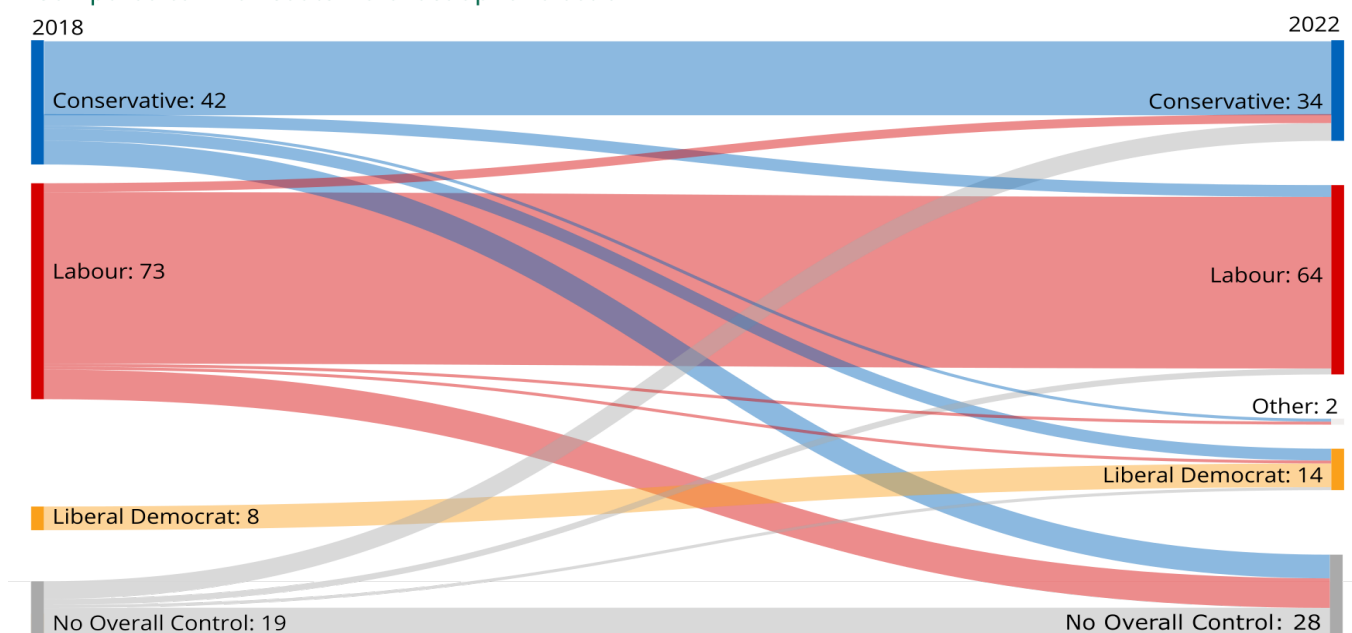

Unless otherwise referenced, the data in this publication has been collected by the House of Commons Library from both council websites and media sources. The data in this publication may differ from other sources, because of the way it's collected. Chapter six discusses how elections data is collected and analysed in full.

Local election results in England

The diagram below shows the changes in council control in England compared to when the seats were last up for election in 2018.

Change in control of English councils up for election, May 2022

Compared to when seats were last up for election

Source: Results published online or provided by local authorities

The results of the 146 elections in England were:

- **Labour** won or retained control of 65 of the councils with elections, including 21 of the 32 London Boroughs. This is eight fewer than it controlled when these seats were last up for election in 2018. Labour gained control of six councils as well as the newly created Cumberland council; it lost control of 15 councils compared with 2018.
- **The Conservatives** won or retained control of 35 councils in England, including winning the new North Yorkshire County council. This is seven fewer than in 2018. The Conservatives won their lowest proportion of seats up for election in the last 10 years (26%).
- **The Liberal Democrats** won or retained control of 16 councils, eight more than in 2018, including two new councils, Somerset and Westmorland and Furness. The party won 16% of seats up for election, four percentage points up on 2018.
- There were 28 councils with **no overall control**, nine more than the last time these seats were up for election in 2018.
- **Aspire** became the first party other than Labour, Conservatives or Liberal Democrats to control a council in London, taking Tower Hamlets from Labour. The Green Party, while not controlling any councils, won 116 seats, compared to 39 in 2018, equivalent to 3% of seats up for election in 2022.

Results in Scotland

Of the 32 councils which held elections in Scotland, 27 had no overall control, two fewer than at the last elections in 2017.

Labour, Liberal Democrats and the SNP each had their share of council seats increase by two percentage points.

The SNP maintained its position with more seats than any other single party, winning 37% of seats. The Conservatives lost seats, winning 63 fewer than in 2017 and remained without control of any council in Scotland.

Both Labour (West Dunbartonshire) and SNP (Dumfries and Galloway) now control one council each. Most councils in Scotland have “no overall control”, 27 of 32, two fewer than in 2017.

Results in Wales

There are 22 councils in Wales. Eight are controlled by Labour, an increase of one from 2017, four by Plaid Cymru, a net gain of three, and nine have no

overall control. Independent councillors make up the majority in Pembrokeshire.

The Conservatives lost control of their only council in Wales, Monmouthshire, to no overall control. Labour won the highest proportion of seats at 43%, while the Conservatives won 9% of seats, six points down on 2017.

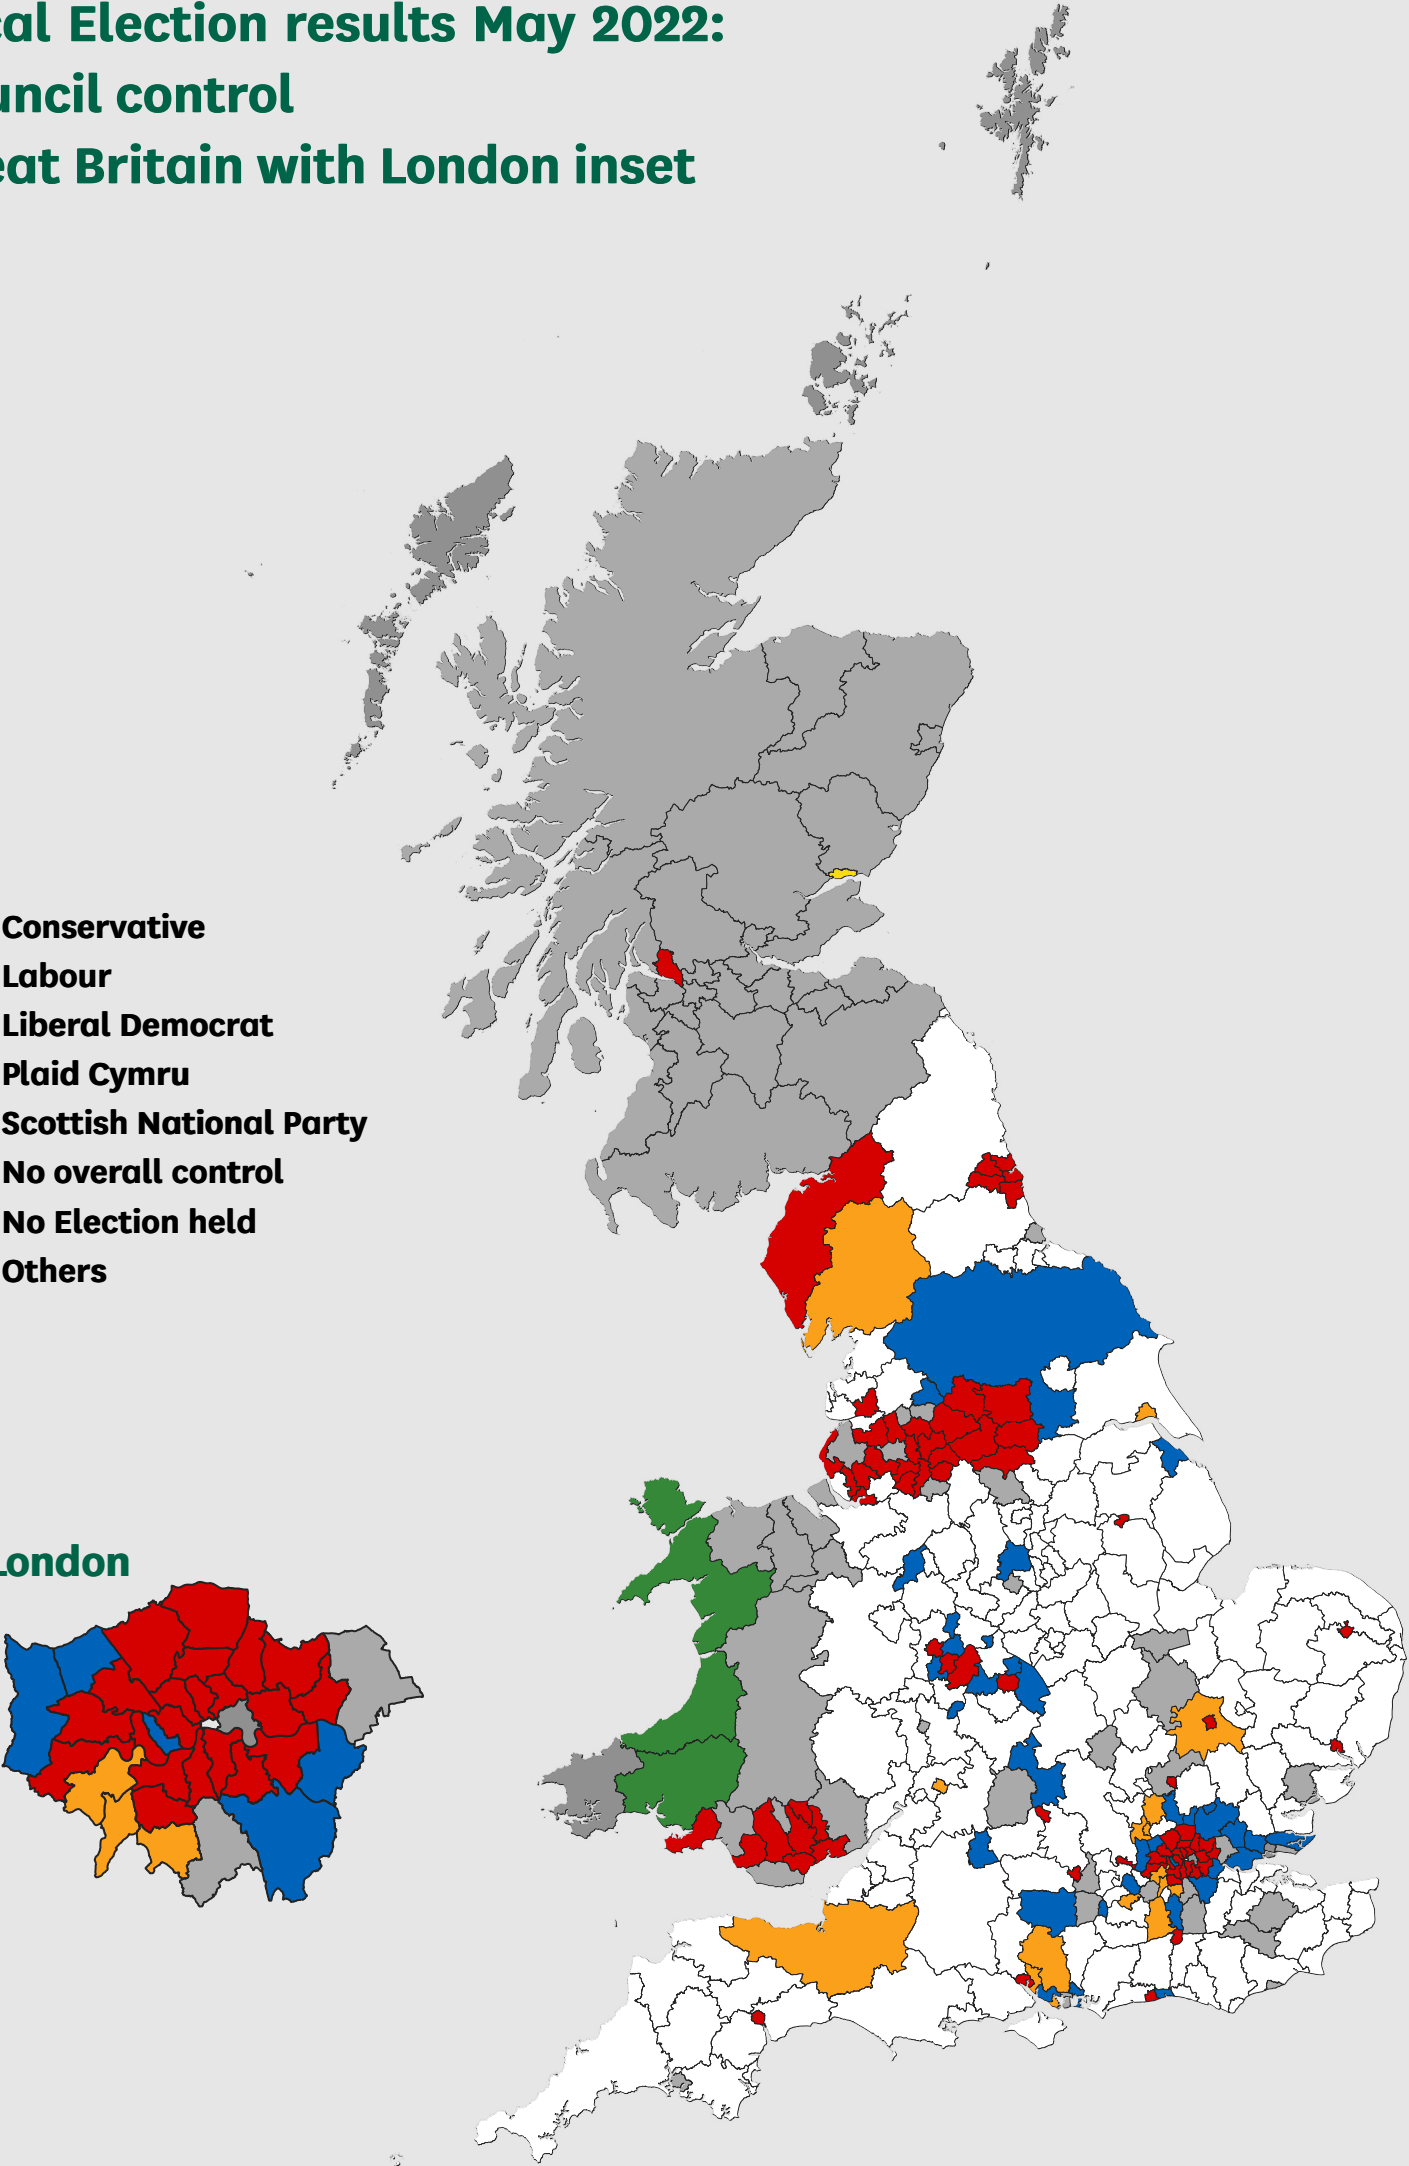

Plaid Cymru maintained its share of 16% of seats in Wales. The party's control of three additional councils was the highest for a party in Wales since Labour's gain of eight in 2012.

The map below shows the results of the May 2022 elections in Great Britain, with an inset to show London in greater detail. This is due to London accounting for a fifth of elections in England but results in London are hard to identify on a national scale map.

Elections in Great Britain

England

All areas of England are covered either by a unitary council, a metropolitan borough council, a London borough council or a county council.

Unitary, metropolitan and London borough councils are all ‘single-tier’ councils.

In most cases county councils and district councils comprise a ‘two-tier’ system, with upper-tier county councils covering multiple lower-tier district councils.

On 5 May 2022, councils in England held elections: 60 district councils, all 32 London boroughs, 33 metropolitan boroughs, and 21 unitary authorities.

Electoral cycles

Local council members are elected for four-year terms using the first past the post system.

There are a variety of electoral cycles (elections are held in different years) so not all councillors are elected at the same time. In some authorities (including London boroughs and all county councils) elections for all councillors are held every four years. Others elect a proportion of members each year.

There are three methods of holding elections to local councils: whole council; thirds; and halves.

Whole: All councillors are elected once every four years, in whole council elections.

Thirds: Councillors are elected for four-year terms by thirds; that is, at each election, a third of the councillors are elected. Elections are held every year except in years when there are county council elections in the rest of England.

Halves: Councillors are elected for four-year terms by halves; that is, at each election, half the councillors are elected. Elections are held every two years.

For more information on future elections see the briefing paper [UK Elections in 2022 and Beyond](#). A timetable of elections can be found in [chapter 8](#), detailing elections due to take place in the UK up to 2026.

Scotland and Wales

Scotland has 32 councils all of which were up for election on 5 May 2022, local elections in Scotland were last held in 2017. Scotland uses the Single Transferable Vote (STV) system, which involves voters ranking candidates in order of preference. Candidates must then receive a specified quota of votes in order to be elected.¹

In Wales, as in England, elections are held using the first past the post (FPTP) system. There are 22 councils in Wales, and all were up for election on 5 May 2022. Local elections in Wales were last held in 2017.

This election was the first time that 16 and 17-year-olds were able to vote in local elections in Wales after the passing of the [Senedd and Elections \(Wales\) Act 2020](#). In Scotland, voters over the age of 16 have been able to vote in elections since the [Scottish Elections Act 2015](#). In England, the voting age is still 18 for all elections. The voting age for general elections is still 18 in all nations in the UK.²

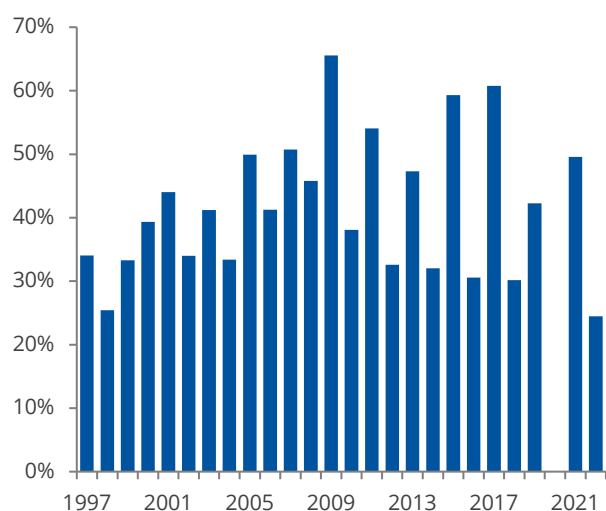

¹ For a full explanation of the STV voting system see page 5 of the Commons Library Briefing: [Voting Systems in the UK](#)

² For more information on voting ages see the Commons Library briefing: [Voting Age](#)

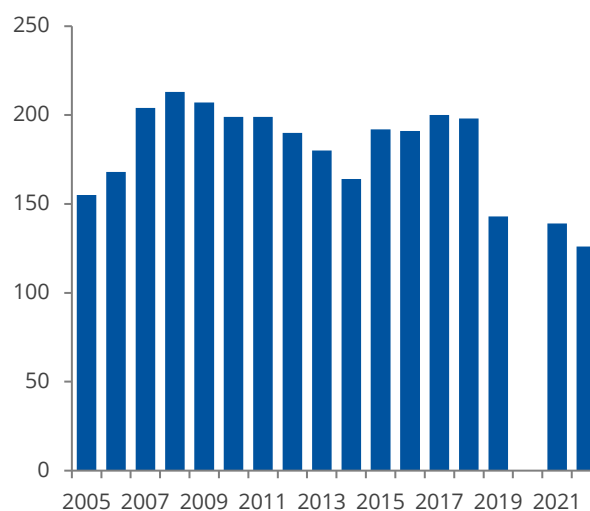

Conservative

The Conservatives won 24% of the seats up for election on 5 May 2022, down from 50% in 2021. The overall number of councils controlled by the Conservatives decreased by 13 compared to immediately before the election. At 126, the total is the lowest in more than 15 years, this is partly due to local authority restructures meaning that there are fewer councils overall.

Liberal Democrat

The Liberal Democrats won 16% of all seats up for election, four percentage points higher than the proportion won in 2021, and the same proportion as they won in 2019. The number of councils the party controlled was 26, four higher than in 2021. This is the most councils controlled by the Liberal Democrats since 2009 and continues the growth seen since a decade low of six councils controlled in 2015.

Green

The Green Party won 116 seats at the local elections on 5 May 2022, around 3% of all seats up for election. This is the highest proportion of seats the Green Party has won in more than twenty years. The Green Party does not currently control any councils in Great Britain.

Percent of seats up for election won^a

Other parties and independents

Other parties and independent candidates won 222 seats in the local elections on 5 May 2022, around 5% of the seats up for election. The highest proportion of seats won by other parties and independents was 15% in 2019. The Aspire party is the first party other than the Conservatives, Labour and Liberal Democrats to take control of a London borough by winning a majority in Tower Hamlets. The council was previously controlled by Labour.

3 Post-election composition

3.1 England: Conservatives hold greatest share of seats and councils

The table below summarises council composition and control for all local authorities in England immediately following the local elections held on 5 May 2022. This includes those where elections were not held.

The Conservatives hold the greatest share of seats and councils in England (40% and 38% respectively). Labour is second with 31% of councillors but third in terms of councils it controls (24%). Councils with no overall majority (NOC) are second, with 29% of councils in England like this.

The Liberal Democrats control 8% of councils in England and have 15% of councillors. 11% of councillors are from 'other parties' or independents, these also make up 2% of councils. The Green Party has 3% of councillors but is yet to control a council.

Source: Source: Rallings and Thrasher, Local Elections Handbooks 2005-2016 and Local Government Chronicle articles

Note: Results for 2022 include the new councils in North Yorkshire and Somerset but do not include the new unitary authorities of Cumberland and Westmorland and Furness

The Conservatives control 13 fewer councils compared with 2021 and Labour gained one more.

The Liberal Democrats control 26 councils, up by four on 2021. This is their highest return since 2009. The proportion of councils that have no overall control has increased and is now nearly double the proportion in 2015, up from 51 in 2015 to 97 in 2022.

In the recent past, the Conservatives typically controlled approximately twice as many councils as Labour (for example, 56% vs. 28% in 2018). However, this is not the case in 2022, the gap between the two parties has shrunk with Labour now controlling 24% of councils and the Conservatives controlling 38%.

For the second year running, no overall control has been the outcome of the second highest number of councils, now at 29%. There were 10 seats in England left vacant after the elections.

A breakdown of council control in England by party and type of local authority is presented below, note that Cumberland and Westmorland and Furness unitary authorities are not included as they are shadow authorities which don't come into practice until April 2023.

English council control immediately after local elections

Source: Rallings and Thrasher, Local Elections Handbooks 2005-2016 and Local Government Chronicle articles

This table shows how Labour dominates control of London, holding 65% of councils. This has stayed the same since 2014. While the Conservatives only control 15% of councils in London, they control 20 out of the 24 county councils in England, or 83%.

The Liberal Democrats control 10% of London boroughs and 13% of district councils but are yet to control a metropolitan borough. The Liberal

Democrats took control of their first county council since 2008, by taking the new Somerset local authority.

Unitary authorities have the highest proportion of councils with no overall control in England at 44% in 2022.

3.2

Scotland: Labour regains lead over Conservatives

The following table summarises the results of the council elections in Scotland for the past five elections. The composition and control shown for local authorities represents the situation immediately following local elections.

In 2022, the SNP maintained its position as the party with the most seats in Scotland, winning 37% of seats, the highest proportion since 2004.

Labour regained its lead over the Conservatives in Scotland which it lost in the 2017 election, winning 23% of seats compared to 17% for the Conservatives. Most councils remain with no overall control (84%), however, there were gains for both the SNP in Dundee and Labour in West

Dunbartonshire. There were three seats in Scotland that were vacant after the 2022 elections.³

3.3

Wales: Conservatives lose seats as Labour strengthens position

The following table summarises the results of the council elections in Wales for the past five elections. The composition and control shown for local authorities is the situation immediately following the local elections.

Source: Rallings and Thrasher Local Election Handbooks, various years; data collected by the House of Commons Library

Note: 2012 includes the Isle of Anglesey election of 2013

Labour improved on its strong position in Wales, increasing its share of seats by five percentage points compared to 2017. It now controls 43% of seats in Wales.

Labour also increased the number of councils it controls by one, now controlling eight councils in Wales (36%).

³ Vacant seats occur when seats not scheduled for election in 2022 are empty at the time of election, this may be due to a councillor resignation or the death of a councillor

The Conservatives lost seats in Wales, from winning 15% of seats in 2017 to 6% in 2022. The party also lost its only council in Wales, Monmouthshire, to no overall control.

Plaid Cymru maintained its highest share of seats since 2004 (16%), and now controls four councils, three more councils than in 2017.

Councils with no overall control still made up the highest proportion with nine of the 22 councils having no overall control (41%). There were two seats vacant after the elections in Wales.

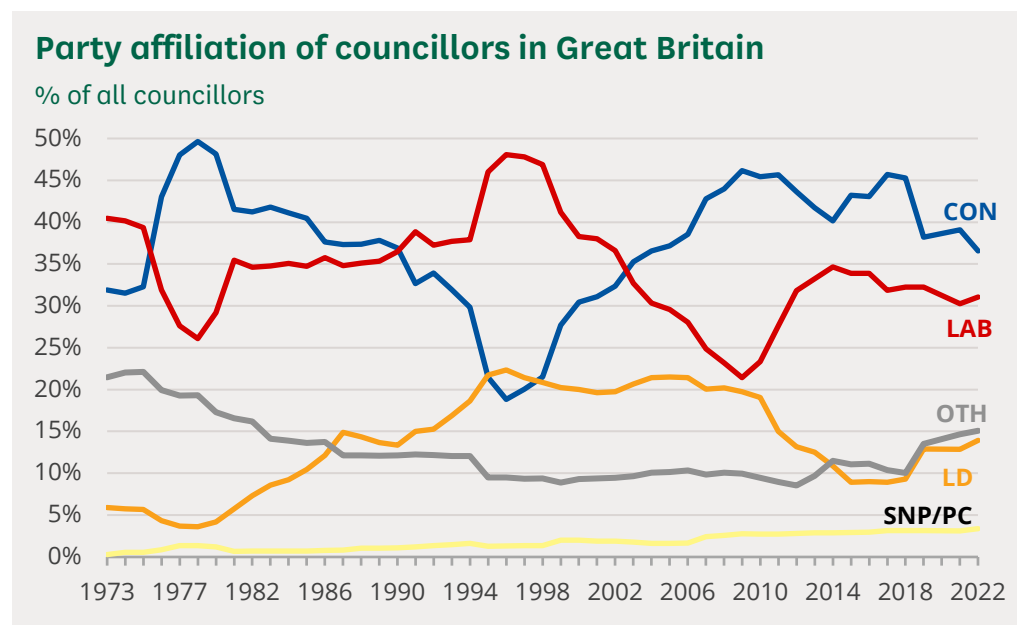

3.4

Great Britain: More Conservative councillors but Labour and Liberal Democrat gains

The chart below shows the number of councillors by party in Great Britain from 1973 to 2021.

Following the elections in May 2022, the Conservatives make up 7,081 (37% of all) councillors in Great Britain, a decrease of 481 councillors from 2021. Labour has 6,016 (31%), 167 more than in 2021.

The Liberal Democrats have 2,696 (14%), and Plaid Cymru and the Scottish National Party combined have 656 (3%). There are a further 2,922 (15%) councillors in Great Britain who are either independents or affiliated to other parties. In total there are 19,371 councillors in Great Britain.

4

Mayoral elections and referendum

4.1

Mayoral elections

There were mayoral elections in seven areas of England on 5 May 2022. South Yorkshire held its second election for the mayor of the combined authority (known as a ‘metro-mayor’)⁴. Six local authorities held mayoral elections for their respective councils, five of which were in London, and there was a referendum in Bristol on whether to change the current system of a directly elected mayor to the committee system.

Combined authority mayor elections							
		First preference		Second preference		Total vote	
		Number	%	Number	%	Number	%
South Yorkshire						LAB hold	
Oliver Coppard	LAB	112,517	43.1%	30,959	68.5%	143,476	71.4%
Clive Watkinson	CON	43,129	16.5%	14,218	31.5%	57,347	28.6%
Simon Biltcliffe	OTH	34,857	13.4%				
Bex Whyman	GRN	32,322	12.4%				
Joe Otten	LD	28,093	10.8%				
David Bettney	OTH	10,177	3.9%				
Electorate		1,003,914					
Turnout		26.0%					

Source: Results published online or provided by local authorities

The Labour candidate for South Yorkshire, Oliver Coppard, won after the election went to second preference votes against Conservative Clive Watkinson. Turnout for the election was 26%, similar to the turnout of the other metro-mayor elections held in 2021.

In half of the six council mayor elections, a Labour candidate won. There was a mayor elected in Croydon for the first time, Conservative Party candidate Jason Perry. In Watford, Liberal Democrat mayor Peter Taylor retained his seat.

There was also victory for the Aspire party in the Tower Hamlets mayoral election, alongside the majority it gained in the local election in the borough.

⁴ More information on metro-mayors can be found in the Commons library briefing: [Devolution to local government in England](#)

In Tower Hamlets, Lutfur Rahman was elected mayor. In four out of six of the elections, a mayor was elected based on the first preference ballots. The average turnout for the six mayoral elections was 33.7%.

Labour's Rokhsana Fiaz for Newham was the only woman to be elected mayor.

4.2

Mayoral referendum

Bristol City Council held a referendum on whether to keep the current mayor and cabinet system or to revert to the committee system in place before the first referendum held in 2012.⁵

The only way to abolish legislation approved by a referendum is to hold a further referendum, with at least a period of 10 years in between. There was

⁵ Chapter 2 of the Commons Library briefing paper Directly elected mayors contains more information on mayoral referendums

10 years and three days between the two referendums 3 May 2012 and 5 May 2022.

The Bristol electorate voted in favour of a change from the current system of a directly elected mayor. This means that once the term of current mayor, Marvin Rees, expires in 2024, the council will hold elections for all seats and a council leader will be chosen from elected councillors.

Bristol mayoral referendum result		
	Votes	%
Bristol		
Change to leader and cabinet model	56,113	59.3%
Keep directly elected mayor	38,439	40.7%
Spoilt ballots	370	
Turnout	28.6%

5

National share of the vote

Because local elections are not held in all local authorities at the same time, it's difficult to get an overview of how much support political parties attract across Great Britain in the years between general elections.

Academics Colin Rallings and Michael Thrasher overcome this by using the results of local elections to estimate how the major parties would have fared had the elections of that year taken place throughout Great Britain. Rallings and Thrasher's National Equivalent share of the vote (NEV) is a widely used estimate of where the parties stand nationally on the basis of voting in local elections.

Source: Rallings and Thrasher, Local Elections Handbook, various years;; Rallings and Thrasher, "City victories are cold comfort for Labour", The Sunday Times, 9 May 2021, Rallings and Thrasher "Hung Parliament Looms in a general election as major parties flounder" 8 May 2022

In 2022, the Conservatives had an estimated 33% of the vote share. This was a drop of seven points from a decade high of 40% in 2021.,

Labour's share increased to 35%, up five percentage points from 30% in 2021. Labour overtook the Conservatives for the first time since 2016. The Liberal Democrats increased from 15% in 2021 to 17% in 2022.

The ‘others’ category stayed at 15%; ‘others’ achieved a similar proportion in 2017 (15%) and 2018 (13%), and their standing had been higher before then, peaking at 32% in 2013. This peak was largely due the rise in popularity of UKIP.

The table below shows the estimated national equivalent vote share in Great Britain as calculated by Rallings and Thrasher every year since 1979, excluding 2020 when no elections were held.

Estimated NEV at local elections: Great Britain

6 About the data

There is no central database where local elections results are collected by an official body.

Academics Colin Rallings and Michael Thrasher have compiled [Local Elections Handbooks](#) each year since 1985. Historical data quoted in this briefing paper is derived, in most cases, from these handbooks. 2022 figures for net change in seats and councils controlled are derived from Rallings and Thrasher's May 2022 articles in [The Sunday Times](#) and [Local Government Chronicle](#).⁶

The House of Commons Library has collected 2022 data on the number of seats won or retained by party and resultant council control for those councils in which elections occurred. These have been cross-checked with that collected by the BBC and local authorities.

This briefing is therefore largely based on data collected by three sources: Plymouth University Election Centre, the House of Commons Library and selected media organisations.

Its findings may in some cases differ from analysis available elsewhere because of different definitions or reference points used.

How are local election results analysed?

Local election results can be analysed by looking at either:

- A) The total number of councils controlled and councillors a party has at a given time; or
- B) The number of councils won/lost or seats won/lost at any given round of elections

It's not always possible to compare directly between data based on definitions 'A' and 'B' as they in effect monitor different things.

'A' looks at the total number of councils controlled or councillors by party at a given time – usually immediately following elections.

'B' looks at net change, comparing the number of councils or seats won/lost at an election to the situation immediately prior to that election.

⁶ Thrasher and Rallings 'Hung Parliament looms in a general election as major parties flounder' Sunday Times 8 May 2022,

A party's number of councillors and number of councils controlled are subject to change over the course of the year (councillors may change parties or by-elections occur, for example), meaning figures used to calculate net change at an election ('B') will not necessarily match with the totals monitored on an annual basis ('A').

7

Appendix

The appendix contains full results for every council which held elections on 5 May 2022. It is broken down as follows:

- England
 - District Councils
 - London boroughs
 - Metropolitan boroughs
 - Unitary Authorities
- Scotland
- Wales
